Subject: Letter of Recommendation

To whom it may concern,

BAE Systems Australia have been working with DG Air freight since April 2022.

They have always offered dynamic, cost effective solutions that meet our needs, with particular focus on response time, flexibility and exceptional customer service.

The services that they provide to BAE Systems Australia are:

- Domestic movements, with particular focus on hazardous goods.
- International movements, with particular focus on hazardous goods.
- DG Office software package.

I have absolutely no hesitation in recommending DG Air to any company that has any of the above requirements.

If I can be of any assistance in providing more information about DG Air Freight, please feel free to contact me.

Sincerely

Logistics Manager  
BAE Systems Australia
